ABOUT ME

I'm a frontend software developer with a passion for user experiences, solving human-based pain points, collaborating on diverse teams, and creative problem-solving. I rely on test-driven development to create JavaScript and React user interfaces with CSS and Sass designs. I consistently bring positive energy, a hard work ethic, and an endless curiosity for knowledge! I'm excited to continue to discover, learn, and grow with amazing people.

SKILLS

HTML	Node.js
CSS/Sass	Express.js
JavaScript	RESTful APIs
React, Redux	TDD, Jest, Supertest
TailwindCSS	Mobile-first Design
PostgreSQL	Responsive Web Design

EDUCATION

2020 • Alchemy Code Lab

Fullstack Software Developer

2018 • Rogue Community College

Certified Clinical Medical Assistant

2007 • National Holistic Institute of Health

Certified Massage Therapist

PROJECT EXPERIENCE

BabyMe

[Github](#) | [Website](#)

React, Material UI, Mapbox API, GeoJSON

This mobile-first designed, daycare app was tailored to busy parents. Our team included a PM, designer, and me. I implemented an interactive map using Mapbox and created a database using GeoJSON to add markers and popups with additional information. I used Material UI to apply our designer's Figma wireframes and to create modals and accordion menus with a filter for daycares.

PageTrade

[Github](#) | [Website](#)

React, Node.js, Express.js, PostgreSQL, bcrypt, Sass, Beautifuldnd library, Styled Components library, Heroku

This website allows users to trade books in a small, traceable communities during the pandemic. I took the lead in our design-driven development and to document our project. I helped to implement a JavaScript/Node.js backend with bcrypt auth routes that update a live feed on a React frontend. I also styled an interactive menu using CSS and Style Components.

Sherlock Stocks

[Github](#) | [Website](#)

React, Node.js, Express.js, PostgreSQL, bcrypt, CSS, Heroku

This full-stack app allows users to learn about the stock market using a custom algorithm. I implemented our API CRUD routes and contributed to the JavaScript/Node.js backend using an Express.js framework. I paired-programmed our React and CSS frontend designs.

PROFESSIONAL EXPERIENCE

2021 • Fullstack Software Developer • Freelance

2018 - 2020 • Certified Clinical Medical Assistant •

Providence Health & Services

2017 - 2018 • Front Desk Associate • South Medford Self Storage

2016 • Guest Experience Specialist • Massage Envy

2007 - 2015 • Certified Massage Therapist • HealthSpring Chiropractic & Amador Valley Chiropractic
